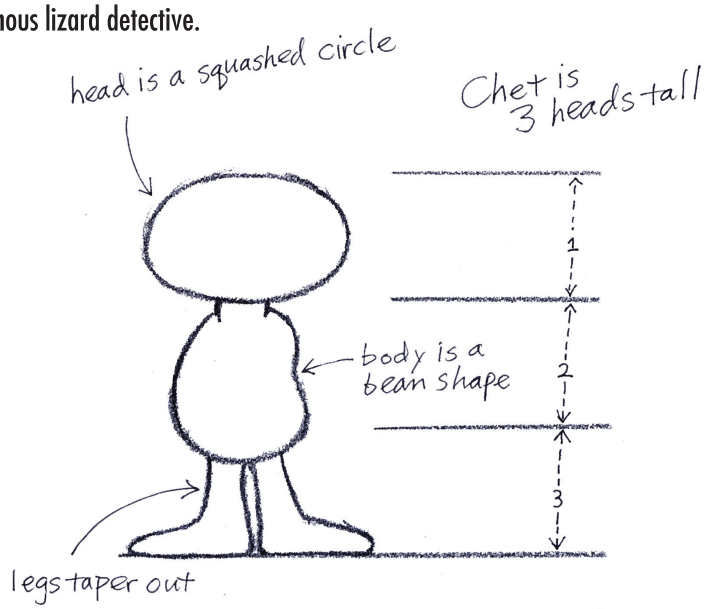
How to Draw CHET GECKO

Feeling artistic? Here's how you draw Emerson Hicky Elementary's famous lizard detective.

Get a pencil, paper, and an eraser (yes, even genius artists use erasers). Put on your fancy artist cap (or whatever cap you can find). Then follow these simple instructions.

Have fun!

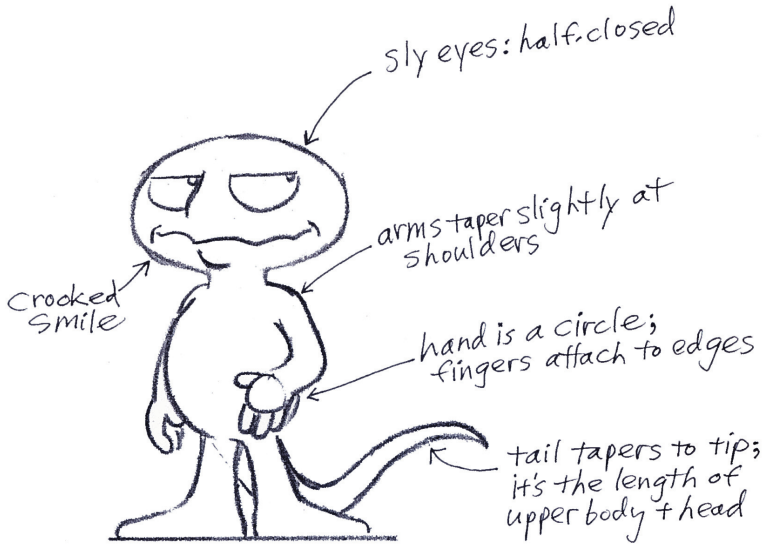


STEP 1

Start with the basic shapes of a circle head and a bean body.

STEP 2

During this step, you erase some of the bean shape—at the neck, arms, and legs. (I told you that eraser would come in handy!)



STEP 3

As you add Chet's clothes, you'll erase even more of the original shapes. But they're still the basis for your drawing. Notice how the brim of the hat comes right down over Chet's eyes. The brim looks almost like eyebrows. Also notice how his front hand rests in a pocket. This is a great trick when you're still learning how to draw hands—hide them!

And now, you're done!
Go forth and be artistic!
